# Audit Updates

<b>Initial Audit</b>	7th November 2022 <a href="https://github.com/cyberscope-io/audits/blob/main/1-v1-v1/audit.pdf">https://github.com/cyberscope-io/audits/blob/main/1-v1-v1/audit.pdf</a>
<b>Corrected Phase 1</b>	23rd November 2022 <a href="https://github.com/cyberscope-io/audits/blob/main/1-v1-v2/audit.pdf">https://github.com/cyberscope-io/audits/blob/main/1-v1-v2/audit.pdf</a>
<b>Corrected Phase 2</b>	25th November 2022 <a href="https://github.com/cyberscope-io/audits/blob/main/1-v1-v3/audit.pdf">https://github.com/cyberscope-io/audits/blob/main/1-v1-v3/audit.pdf</a>
<b>Corrected Phase 3</b>	29th November 2022 <a href="https://github.com/cyberscope-io/audits/blob/main/1-v1-v4/audit.pdf">https://github.com/cyberscope-io/audits/blob/main/1-v1-v4/audit.pdf</a>
<b>Corrected Phase 4</b>	2nd December 2022

# Contract Analysis

● Critical ● Medium ● Minor / Informative ● Pass

Severity	Code	Description	Status
●	ST	Stops Transactions	Passed
●	OCTD	Transfers Contract's Tokens	Passed
●	OTUT	Transfers User's Tokens	Passed
●	ELFM	Exceeds Fees Limit	Passed
●	ULTW	Transfers Liquidity to Team Wallet	Passed
●	MT	Mints Tokens	Passed
●	BT	Burns Tokens	Passed
●	BC	Blacklists Addresses	Passed

# Contract Diagnostics

● Critical   ● Medium   ● Minor / Informative

Severity	Code	Description	Status
●	PVC	Price Volatility Concern	Unresolved
●	RSML	Redundant SafeMath Library	Unresolved
●	L04	Conformance to Solidity Naming Conventions	Unresolved
●	L07	Missing Events Arithmetic	Unresolved

## PVC - Price Volatility Concern

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L684
<b>Status</b>	Unresolved

### Description

The `_minTokenBalance` could produce a dramatically price volatility. If the variable set to a high number, then the contract will sell a huge amount of tokens in a single transaction.

```
function setMinimumTokenBalance (uint256 minimumToken) external onlyOwner {  
    _minTokenBalance = minimumToken;  
}
```

### Recommendation

The contract could ensure that it will not sell more than a reasonable amount of tokens once. A suggested implementation could check that the maximum amount should be less than a fixed percentage of the total supply.

## RSML - Redundant SafeMath Library

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L15
<b>Status</b>	Unresolved

### Description

The Solidity versions that are greater than or equal to 0.8.0 do not need the use of SafeMath Library. The usage of the SafeMath library produces unnecessary additional gas.

```
library SafeMath {  
  ...  
}
```

### Recommendation

The team is advised to remove the SafeMath library as it is safe to do math operations without it.

## L04 - Conformance to Solidity Naming Conventions

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L511,507,501,527,322,339,321,508,526,504,525,359,506
<b>Status</b>	Unresolved

### Description

Solidity defines a naming convention that should be followed. Rule exceptions:

- Allow constant variable name/symbol/decimals to be lowercase.
- Allow `_` at the beginning of the `mixed_case` match for private variables and unused parameters.

```
_tTotal  
_symbol  
_isExcludedFromAutoLiquidity  
_uniswapV2Pair  
PERMIT_TYPEHASH  
MINIMUM_LIQUIDITY  
DOMAIN_SEPARATOR  
_decimals  
_uniswapV2Router  
...
```

### Recommendation

Follow the Solidity naming convention.

<https://docs.soliditylang.org/en/v0.8.17/style-guide.html#naming-conventions>.

## L07 - Missing Events Arithmetic

<b>Criticality</b>	minor / informative
<b>Location</b>	contract.sol#L691,701,706,684,696,711
<b>Status</b>	Unresolved

### Description

Detected missing events for critical arithmetic parameters. There are functions that have no event emitted, so it is difficult to track off-chain changes.

```
taxFee = amount
percentageOfLiquidityForMarketing = marketingFee
maxWalletToken = amount
_minTokenBalance = minimumToken
liquidityFee = amount
maxTxAmount = amount
```

### Recommendation

Emit an event for critical parameter changes.

<b>Registrar</b>	GoDaddy.com, LLC
<b>Registrar IANA ID</b>	146

The domain was created 4 months before the creation of the audit. It will expire in 8 months.

There is no public billing information, the creator is protected by the privacy settings.

## Summary

Vacuum is an interesting project that has a friendly and growing community. The Smart Contract analysis reported no compiler error or critical issues. The contract Owner can access some admin functions that can not be used in a malicious way to disturb the users' transactions. There is also a limit of max 6% fees.

# About Cyberscope

Coinscope audit and K.Y.C. service has been rebranded to Cyberscope.

Coinscope is the leading early coin listing, voting and auditing authority firm. The audit process is analyzing and monitoring many aspects of the project. That way, it gives the community a good sense of security using an informative report and a generic score.

Cyberscope and Coinscope are aiming to make crypto discoverable and efficient globally. They provide all the essential tools to assist users draw their own conclusions.
